

Transfer Agreement

South College and Southwestern Community College

South College and Southwestern Community College hereby enter into a partnership that promotes student transfer and program articulation. The partnership facilitates the transfer of associate degree course credit to program requirements for South College undergraduate programs.

The intent of the agreement is to encourage Southwestern Community College students to complete the prerequisite courses needed for South College programs at Southwestern Community College prior to transfer to the South College Asheville Learning Site to begin major courses. Please refer to Appendix A to view specific programs included in the transfer agreement. Southwestern Community College students who successfully complete the prerequisite courses will have credits accepted for transfer without evaluation on a course-by-course basis (See Transfer Checklist associated with each program). This does not guarantee admission to any South College program. All other academic and program requirements for the major degree and college (such as the college admission requirements, grade point average, technical standards, interviews, drug/background screenings, observation hours, additional courses, etc.) must be satisfied. Students in any articulated program will not be expected to meet any additional (or fewer) requirements than non-transfer South College students.

1. Southwestern Community College will signify on the student's transcript that the courses were completed according to the articulated curriculum. South College will, when evaluating the student's transcript, honor the terms of the agreement for admission to South College.
2. Prior to completing, Southwestern students should have access to counsel from Southwestern Community College and/or South College staff on the study leading to completion of the degree they are seeking at South College. During this period, students should also have access to counsel by South College staff regarding requirements of the program of study at South College.
3. Students must meet all other graduation requirements of South College including the general, major, and professional education requirements. This includes minimum credit hours, institutional/departmental grade and grade point average requirements, and upper division credit and grade point average requirements, as stipulated in the South College Catalog.

4. For participating students, the transfer agreement is effective for six years from the original entry into college level work at Southwestern Community College. If more than six years elapse from the student's initial date of participation under the agreement, the transfer agreement in place at the time of transfer to South College will determine the student's progress toward degree completion.

**PROPOSAL TO SOUTHWESTERN COMMUNITY COLLEGE
FROM
SOUTH COLLEGE ASHEVILLE LEARNING SITE
TRANSFER AGREEMENT
FOR
AAS IN PHYSICAL THERAPIST ASSISTANT
TO
BACHELOR OF HEALTH SCIENCE (POST PTA)**

The following proposal is designed to provide a means by which graduates of the AAS in Physical Therapist Assistant (PTA) from Southwestern Community College can transfer associate degree course credits to the Bachelor of Health Science (Post PTA degree) at South College Asheville Learning Site. The intent of the proposed agreement encourages students to complete their associate degree and other pre-requisites identified in the agreement before transferring into the BHS degree at South College. The BHS (Post PTA) degree provides students with the ability to utilize credits earned as a PTA towards the completion of the BHS degree. There are only a handful of programs in the United States that allows the PTA graduate to apply those specific PTA major credits towards a bachelor degree. Once earned, the graduate of the BHS (Post PTA) program has the necessary requirements to apply to the vast majority of Doctorate of Physical Therapy (DPT) programs in the country, including the DPT program at South College. For those that choose not to continue their education, the BSHS degree provides them with additional training for moving into administrative roles in healthcare.

The proposal outlines the curriculum of the BHS (Post PTA) degree, the course transfer checklist for the two schools, and courses needed for the transfer student. Typically, the bachelor level courses are offered in the evenings or on-line, allowing students working as physical therapist assistants to work while completing the bachelor courses at night. In order to earn the degree, students must earn at least 40% of the program credits at South College.

This North Carolina Board of Governors and SACSCOC approved program allows those with an associate degree in physical therapist assistant to continue with science, business, and leadership courses, obtain a bachelor degree, and prepare them, if they so desire, to pursue graduate studies.

OVERVIEW OF THE BACHELOR OF HEALTH SCIENCE (POST PTA)

Mission

The mission of the Bachelor of Health Science (Post Physical Therapist Assistant Degree) program is committed to advancing educational opportunities for those students who have completed an asocial level physical therapist assistant (PTA) degree. Graduates may enhance their marketability for administrative

positions in physical therapy or health care environments or continue with their education after earning the bachelor's degree to a Doctorate of Physical Therapy program.

Purpose

The focus of the Bachelor of Health Science (Post Physical Therapist Assistant Degree) program is to provide a comprehensive health science education to undergraduate students. The program is committed to advancing educational opportunities for those students who have completed an associate level Physical Therapist Assistant degree. As a pre-professional program, it is designed to provide the foundational degree for those wishing to pursue graduate education in the field of physical therapy. For those students who do not go on to graduate study, the program provides opportunities to earn a bachelor's degree in order to enhance their marketability for administrative positions in Physical Therapy or health care environments.

The Bachelor of Health Science (Post Physical Therapist Assistant Degree) program objectives further support the College's mission of providing students with the "awareness of the significant impact of their professional and individual contributions on the community, the nation, and the country's global standing." The program's goal that students will "Graduate professionals whose skills and knowledge meet the current physical therapy administrative needs of the health care community in the state of North Carolina, United States, and when appropriate, the international community" prepares them to begin a career making contributions to their profession.

Bachelor of Health Science (Post Physical Therapist Assistant Degree) Program Goals

The following goals will represent the hallmark of our graduates and will be reflective of the mission of the program and the college as a whole:

1. Graduate health care professionals who are capable of assuming leadership roles in informatics and healthcare management.
2. Graduate students who display critical-thinking skills, a commitment to life-long learning, and a readiness for graduate education.
3. Graduate professionals whose skills and knowledge meet the current physical therapy administrative needs of the health care community in the state of North Carolina, United States, and when appropriate, the international community.

The Bachelor of Health Science (Post Physical Therapist Assistant Degree) to:

- continue their education towards obtaining a Doctorate in Physical Therapy;
- integrate theory and research-based knowledge and skills from arts, humanities, and sciences, and to develop a foundation for professional and personal life;
- demonstrate compassionate, spiritual, ethically sensitive, and mature clinical decision making skills based on critical thinking;
- understand the role and responsibilities of a professional leader in the health care delivery system by embracing the value of lifelong learning;
- function in a health care management role;
- demonstrate inter-professional communication and collaboration for improving patient health outcomes;
- demonstrate analytical inquiry for evidence-based health care practice;

- utilize health care policies and healthcare economics in shaping healthcare delivery;
- participate as an advocate in the political process to influence health care policy to improve the health care system;
- evaluate and enhance one's own professional values of altruism, autonomy, human dignity, integrity, social justice, and inter-professional conflict management in dealing with health issues, health promotion and prevention across the life span.

**PROPOSAL TO SOUTHWESTERN COMMUNITY COLLEGE
FROM
SOUTH COLLEGE ASHEVILLE LEARNING SITE
TRANSFER AGREEMENT
FOR
AAS IN PARALEGAL TECHNOLOGY
TO
BACHELOR OF SCIENCE IN LEGAL STUDIES**

The following proposal is designed to provide a means by which graduates of the AAS in Paralegal Technology from Southwestern Community College can transfer associate degree course credits to the Bachelor of Science in Legal Studies at South College Asheville Learning Site. The intent of the proposed agreement encourages students to complete their associate degree and all other prerequisites identified in the agreement before transferring into the BS degree at South College. The proposal outlines the curriculum of the BS in Legal Studies degree, the course transfer checklist for the two schools, and courses needed for the transfer student. Typically, the bachelor level courses are offered in the evenings, allowing students working in the paralegal field to work during the day in their field while completing the legal studies courses at night. In order to earn the degree, students must earn at least 40% of the program credits at South College.

The proposal outlines this North Carolina Board of Governors, SACSCOC, and American Bar Association approved program allows those with an associate degree in legal studies to continue with substantive law courses, obtain a bachelor degree, and prepare them, if they so desire, to pursue graduate studies.

OVERVIEW OF THE BACHELOR OF SCIENCE IN LEGAL STUDIES

Bachelor of Science LEGAL STUDIES

The mission of the Bachelor of Science in Legal Studies program is to provide students with a broad academic background in general education, fundamental theoretical legal concepts, and practical applications. This rigorous ABA Approved Paralegal Education Program is designed for the student who clearly shows potential for a career in the legal profession and similar fields.

The coursework emphasizes the development of keen analytical skills and fosters sensitivity to cultural and political history and diversity. Graduates can become contributing members of the legal office in private law firms, banks, insurance companies, title and mortgage companies, governmental and law enforcement agencies, and other corporations. The curriculum's focus on legal theory, application, and critical thinking allow graduates to perform high-level paralegal duties, with the exception that paralegals are not permitted to give legal advice, appear in court, accept cases, or set

fees.

The objective of this program is to provide students, through completion of courses consisting of lecture, practical application, and hands-on computer instruction, with the knowledge and skills necessary to become contributing members of a team in the legal environment.

LEARNING OUTCOMES

Learning Outcome #1

Students will demonstrate knowledge of fundamental theoretical legal concepts necessary to hold a paralegal position under the direction and supervision of a licensed attorney.

Learning Outcome #2

Students will develop analytical and reasoning skills that promote independent thinking.

Learning Outcome #3

Student will demonstrate knowledge regarding the significance of historical, cultural, and political diversity as it relates to the laws and the administration of justice.

Learning Outcome #4

Students will develop legal research, writing and drafting skills necessary to hold a paralegal position under the direction and supervision of a licensed attorney.

Learning Outcome #5

Students will demonstrate knowledge of appropriate professional and ethical responsibilities as set forth in the rules of professional responsibility and other related guidelines, laws, and directives.

**PROPOSAL TO SOUTHWESTERN COMMUNITY COLLEGE
FROM
SOUTH COLLEGE ASHEVILLE LEARNING SITE
TRANSFER AGREEMENT
FOR
AAS IN RADIOGRAPHY
TO
BACHELOR OF SCIENCE IN RADIOLOGICAL SCIENCES**

The following proposal is designed to provide a means by which graduates of the AAS in Radiography from Southwestern Community College can transfer associate degree course credits to the Bachelor of Science in Radiological Sciences at South College Asheville Learning Site. The intent of the proposed agreement encourages students to complete their associate degree and other pre-requisites identified in the agreement before transferring into the BS degree at South College. The BS in Radiological Sciences degree provides students with the ability to utilize credits earned as a Radiologic Technologist towards the completion of the BS degree.

The Imaging Science Bachelor of Science program prepares students to assume leadership roles in the field of Imaging Sciences. The ASRT recognizes the baccalaureate degree as the professional level of Radiological Sciences education. Typically, a bachelor's degree is required for entry-level management positions at the departmental level within health care organizations or faculty positions in associate degree programs. Imaging department managers are often responsible for multi-million dollar facilities and equipment and a significant number of employees. Imaging Science educators are responsible for administering educational programs, developing operational budgets, instruction, and maintaining program integrity and accreditation. To make effective decisions, leaders in imaging need to be open to different opinions, analyze contradictory information, understand finance and information systems, and interpret data. Motivating others to implement their decisions requires strong leadership abilities. Tact, diplomacy, flexibility, and communication skills are also essential. The degree programs facilitate matriculation of diploma or associate degree imaging professionals to the bachelor's level.

The proposal outlines this North Carolina Board of Governors and SACSCOC approved curriculum of the BS degree, and the course transfer checklist for the two schools. In order to earn the degree, students must earn at least 40% of the program credits at South College.

OVERVIEW OF THE BACHELOR OF SCIENCE IN RADIOLOGICAL SCIENCES

MISSION

The mission of the Bachelor of Science program is to prepare students to qualify for advanced positions within a health care team dedicated to the conservation of life and the maintenance of health, which

includes prevention and treatment of disease by:

1. Providing a quality education, both clinical and didactic, in the health sciences to prepare health professionals for advanced positions or leadership roles in accordance with professional and accreditation guidelines;
2. Broadening a student's knowledge, cognitive skills, and generalize theoretically learning through liberal arts and science studies;
3. Promoting the health professions by addressing the significance of specific roles and associated professional issues;
4. Providing competent health practitioners with educational experience beyond an associate degree level with in-depth concentrated learning experiences;
5. Expanding and enhancing job mobility and promotion for health professionals; and
6. Providing the health care community with a professional competent and appropriate workforce.

INFORMATION FOR CURRENTLY CERTIFIED RADIOLOGIC TECHNOLOGISTS AND REGISTRY ELIGIBLE

Applicants, who are currently registered as Radiologic Technologists with the ARRT, can qualify for full transfer of credits earned in their completed two-year program of radiologic technology study towards the Bachelor of Science in Radiological Sciences degree program. Graduates from a JRCERT two-year accredited program, who are not registered, but who can provide proof of registry eligibility, may also receive full credit for their associate degree.
